## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 11, drawn to a method for manufacturing a shape body containing a starch, classified in class 264.
  - II. Claims 12 - 21, drawn to a homogenized starch-containing mass, classified in class 428, subclass 35.2.
  - III. Claim 22, drawn to a device for manufacturing a soft capsule, classified in class 53, subclass 900.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I, claims 1 - 11 and Group II, claims 12 - 21 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as sending the mixture through a pair of embossed nip rollers to form a continuous film that has been reshaped in a set pattern.
3. Inventions Group I, claims 1 - 11 and Group III, claim 22 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2)

Art Unit: 1772

the apparatus as claimed can be used to practice another and materially different process.

(MPEP § 806.05(e)). In this case the process claimed can be practiced by another and materially different apparatus such as a pair of embossed nip rollers.

4. Inventions Group III, claim 22 and Group II, claims 12 - 21 are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product can be made by a materially different apparatus such as a pair of embossed nip rollers to reshaped the formed film with a set pattern.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different modes of operation, different functions, different effects and their divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1772

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
